QUALITY STAINLESS STEEL BENCHTOP MANUFACTURERS

CARING FOR YOUR STAINLESS STEEL BENCHTOP

We recommend regularly cleaning your stainless steel benchtop with warm, soapy water, followed by rinsing with warm clean water, and finish by wiping dry with a clean, absorbent cloth.

Never use abrasive cleaners or steel wool as nearly all of these will scratch the bright, polished stainless steel surface. Should you wish to use a cleaning product, we've found most glass and surface cleaners, together with a non-scratch pad will adequately clean your benchtop.
